PUT IT INTO OVERDRIVE

With Michaelangelo Overdrive, creating a masterpiece of overdrive sound is as easy as 1-2-3. Just set your **GAIN**, **TONE** and **LEVEL** - and your guitar will sing like a chorus of angels.

GAIN controls the amount of overdrive added to your clean sound. The quality of the gain is extraordinary at any level - so experiment for a sound that's perfect for your playing.

TONE gives you a whole new dimension of sonic control, so you can shape the character of your gain from thick and creamy to razor blazing.

LEVEL lets you control the overall output of the pedal - balancing it with your clean sound, or boosting it to cut through the mix.

KEEPING IT SIMPLE

When you've got hot licks to deliver, you don't have time to fiddle with complicated boxes. That's why we've kept Michaelangelo Overdrive simple - with just 1 input and 1 output. The unit is powered by a 9V battery or by external power.
