NO-GRATE LIQUID LAUNDRY DETERGENT

1/2 cup of Borax  
1/2 cup of Washing Soda  
1/2 cup of Dish Soap  
4 cups HOT water  
Essential Oils (optional)

Instructions:
Add the borax, washing soda, and dish soap to your container, then pour in the hot water to dissolve the ingredients.

Fill the container the rest of the way with cold water. (The ingredients do tend to settle at the bottom between uses, but I just give the bottle a good shake before adding it to the washer.)

For a regular load of laundry, a 1/4 cup of this detergent should be sufficient. If you're doing a large or heavily-soiled load, use closer to 1/3 cup.

DIY TOOTHPASTE

3 tablespoons coconut oil  
1-2 tablespoons baking soda  
10 drops essential oil (peppermint, clove, spearmint)  
Stevia (optional)

Instructions: Mix together!
