

CHA CHA'S DOGGIE PROGRAM

After more than 15 years in the industry we've learned a few things and we are excited to pass this information on to you and your trusted furry companion(s). We consistently review our program ensuring we are catering to natural canine instincts and providing various types of stimulation aimed at caring for the "whole" dog.

Most dogs, on average, clock in approximately 12-14 hours a day sleeping time. Sleep is restorative, refreshing and it feels good. While sleep requirements can vary drastically from breed to breed the fact remains, left to their own, dogs put in some serious hours of R&R. Often times these well rested dogs are waiting impatiently for their parents to get home from work and entertain them!

Our program will provide an outlet for that pent up energy and for the canine kids who simply cannot tolerate separation from their human companion(s). They spend their day playing freely with each other in a cage free environment. Dogs roam indoors and out at their own discretion. Each play area is staffed and supervised to ensure every dog has a safe experience.

Our Daily Schedule is designed to encourage appropriate play in groups that match your dog's size and energy level. While cage free play is beneficial to many dogs, some dogs require and benefit from rest periods. Rest periods are assigned upon

the parents' request or at the recommendation of our skilled team. These short breaks allow some alone time for rest and relaxation between play sessions. This is ideal for young puppies, seniors, anxious kids and those who are still developing their group play skill set.

We have very high expectations for our canine kids regarding respect both during group play and rest times. We take the necessary time to ensure each guest understands and adheres to the pack rules. The structure of our program will naturally redirect behaviors such as back talk, jumping, excessive barking, toy or food guarding, food snatching, appropriate potty spots, rude play, selective listening and other surprises that may pop up along the way.

We are happy to dedicate additional personalized time with our skill development sessions, helping to enhance or create manners in many areas such as leash pulling, waiting nicely, calm greetings, crate training, door bolting and more!

We strive to provide a balance of mental and physical stimulation daily. Clear boundaries and expectations ensure that your dogs' experience here will lead to long term happy and healthy relationships that reach far beyond our walls.

We are excited to have you join our family!
