

Integration in Health Centers: Serving the Whole Patient

Maine's Community Health Centers (CHCs) provide a medical home for all patients to meet their medical, dental and behavioral health needs.

- Maine's CHCs have 43 locations that deliver fully integrated behavioral health services. These locations had 85,681 behavioral health visits in 2013.
- 20 locations provide integrated dental health services. These sites had 82,789 dental visits in 2013.
- In addition to primary care, behavioral and dental health services, patients also receive: physical and occupational therapy, pharmacy services, optometry services, podiatry services, and numerous others.
