Through a collaborative and responsible sourcing arrangement, we are able to have a significant impact on the lives of local partners, ensuring that these farming communities enjoy improved livelihoods.

PRODUCT DESCRIPTION

Known as the “tree of life,” Arborvitae is majestic in size and abundant in therapeutic benefits. Arborvitae essential oil has a high content of tropolones, a group of chemical compounds that protect against environmental and seasonal threats, have powerful purifying properties, and promote healthy cell function. Hinokitiol, one of the tropolones in Arborvitae, protects the body from harmful elements while supporting normal cell activity. This compound also contributes to Arborvitae’s natural insect repellent properties. Thujic acid, another tropolone found in Arborvitae, has been studied for its ability to protect against common threats in the environment. Native to Canada, all parts of the Arborvitae tree were used extensively by Native Americans for health benefits and for building vessels, totem poles, baskets, and clothing. Because of its natural preserving properties, Arborvitae prevents wood from rotting, which makes it popular in woodcraft and for preserving natural wood surfaces.

- Add a few drops to a spray bottle with water and spray on surfaces or hands to protect against environmental threats.
- Apply to pulse points to promote healthy cell function.
