

Essentials of Anterior Segment Imaging

February 24, 2018,

8:00AM–5:00PM

New Orleans

Featured Speakers:

Denice Barsness, CRA, COMT, CDOS, ROUB *San Francisco, CA*

Mark Maio, FOPS *Atlanta, GA*

imatters is proud to partner with EyeTeachU as a sponsor for Essentials of Anterior Segment Imaging Continuing Education.

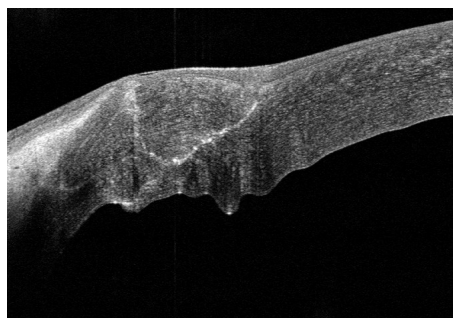

Stay up to date on eye care continuing education and career events.

NOAO

Essentials of Anterior Segment Imaging provides ophthalmic technicians and imagers with the foundation necessary to perform anterior segment imaging, slit lamp biomicrography, anterior segment OCT, corneal topography *and* an understanding of the principles behind the technology. With a grounding in anterior segment ophthalmic anatomy, physiology, pharmacology and disease processes, the ophthalmic imager not only learns how to image the eye but also understands what it shows and why it is important. Our goal is to improve the skills of individuals performing ophthalmic imaging so they can capture the best images possible, thus enhancing their crucial role in the treatment and prognosis of patients.

Presentations:

- Purposeful Looking: Anterior Segment Anatomy
- Fundamentals of Slit Lamp Biomicrography
- Anterior Segment OCT
- Photography Principles for Ophthalmic Imaging
- Corneal Topography Fundamentals
- UBM Imaging for the Anterior Segment
- Imaging Options for the Oculoplastics Specialist
- Integrated Imaging: Cases from our Files

**Pending Approval for 7.5 JCAHPO and
7.50 OPS 1:1 CEC**
