

# SUCCESS X DESIGN

## OFFICE DESIGN X ASHLINA

LET'S TURN YOUR OFFICE INTO A MONEY MAGNET!

Over the years I have worked with countless entrepreneurs in designing an office that is representative of what they are up to in the world. You want your office to portray success, luxury, professionalism even if you are just working from home. Whether you want to up your Instagram game with an environment from gorgeous photos or create a bad ass video backdrop, you can use your office to build your business in a chic way.

Using secrets from Feng Shui, the art of decluttering along with elements from your personal and business brand, I will help you create an office that lights you up and has you working with passion and purpose.

Together, we will create the office of your dreams!

### PHASE ONE: Define your vision

We begin by discovering your style. Think of your office style as an expression of your brand and the overall vibe of the success you want to attract. We will have a Skype session, create a Pinterest board and get down exactly what you are wanting to create.

### PHASE TWO: Budgeting + Planning

We will next create your color concept, layout and spacing. Then move forward with an overall budget for your space. From there, I will help you create a game plan with ordering and purchasing to style your office to perfection.

Are you ready to amp up your success? Let's get started. . .
