## BOMBARDIER CHALLENGER 604

It is clear that passenger comfort was at the forefront of the Bombardier Challenger's development.

The vast cabin width and height, sizeable washroom, and opulence throughout are immediate indicators of this claim however it is the bones of the vessel - namely passive noise insulation, apple based entertainment systems, and in flight luggage access - that distinguish it as a supremely comfortable carrier.

True to its name there are no conditions too challenging for this aircraft boasting a maximum cruise speed of Mach .82 and an intercontinental range of over 3,800 nautical miles. You can rest assured you'll be soaring to your final destination rain, hail, or shine.
