

From the Corner Office

PS&S is expanding...again. Our Wall office is benefitting from the addition of Bill Salmon who is tasked with integrating his civil land development team with our outstanding environmental and utility services. Monmouth and Ocean counties present enormous opportunities for growth and with Bill as a new Senior Director of Land Development we have the right man in place. Bill joined our company in April and brings 28 years of experience for our current and future clients.

Further south in Cherry Hill, we are thrilled to be adding three architects to our existing team. Charles Clauser, Harry Wright and Steven Sgro are new to PS&S, but with a combined 88 years of experience in the architecture industry, they are certainly not new to the profession, or to Cherry Hill. We are especially excited to capitalize on their collective experience in the Healthcare Sector which is clearly one of the fastest growing industries in our region.

2015 is turning into a year of transition at PS&S from our expansion throughout New Jersey to our [executive changes](#) as detailed in NJBIZ. We know many of you are enjoying time at the shore this summer, and we are proud to be part of the rebuilding process in the three years since Superstorm Sandy. PS&S has been involved in projects that have helped restore our shore communities, whether you're driving down Route 35 or walking the boardwalk in Seaside Heights. In October, we will reflect on the progress we have made and how building in [flood-prone areas](#) has changed forever.
