b. AAA
   i. About 30 funding requests this year. Adequately utilized the budget.

c. Campus Improvement
   i. Did not accomplish a lot because they started off with an ambitious agenda. Worked on the room draw process, worked to get more washing machines in north quad, worked to update the bubble plans, worked to get more water fountains in Crown, worked to get more snapchat filters across campus, worked to get outside seating at Collins, working on getting a smoothie machine in Roberts. Next year, they hope to get on familiar terms with the administrators/story house very early on, and to make a master list of funding avenues on campus.

d. Environmental Affairs
   i. This Wednesday, Collins will be serving a plant-based burger. This year, Environmental Affairs committee passed the sustainability fund, which has funded many very cool projects! Additionally, it has worked with different places on campus to use more sustainable practices, weighed the waste at Collins, and suggested more sustainable practices at the Athenaeum.

e. Student Engagement
   i. Biggest project is going out tomorrow - ASCMC exit survey. This survey will allow us to have a pulse on CMC so we can improve as a student government.
   ii. Next year, hopes to have increased information on Title IX and sexual assault resources. Also, they hope to create a skimm for senate. Possibly creating a suggestion box!

f. Tech Affairs
   i. Said goodbye to the clickers, and hello to Slack! Still working out the features of Slack since Slack changed the website. Created an Athenaeum guidelines brochure. Hopes to bring back the school-wide calendar, and have it automatically update.
