

## Westview Productions Corporate Initiatives

### QUALITY ASSURANCE STANDARDS

Quality assurance is our most valuable asset at Westview. Our Quality Assurance Team meets regularly to review, evaluate, discuss, and establish new procedures and protocols for the various tasks our team members employ both in the office and in the field. We use an internal proprietary eight-metric system in conjunction with a three-person review team to ensure our processes of accuracy, efficiency, and quality are all exceeding not only our customers' expectations, but our own metrics for quality.

### MEMBERSHIPS AND AFFILIATIONS

IES.....Illuminating Engineering Society  
LEED.....Leadership in Energy and Environmental Design  
USGBC.....United States Green Building Council  
TEA .....Themed Entertainment Association  
USITT .....United States Institute for Theatre Technology

### GREEN INITIATIVE POLICY

Westview applies a forward-thinking Green Initiative company-wide to minimize our impact on the environment. This Green Policy includes the following practices and procedures:

1. Recycling of general waste including paper, cardboard cartons, aluminum cans, glass, and plastic containers. Westview maintains separate containers for the collection of these items in many of its facilities and strongly encourages employees to use them.
2. Recycling of scrap metal and delivering it to salvage yards where it can be melted down and reprocessed for re-use.
3. Recycling of bulbs, batteries and other items that contain environmentally hazardous chemicals.
4. Utilizing paperless systems whenever possible for processing bids, projects, purchase orders, and invoices.
5. In-house composting system for all organic matter used regularly in the cafeteria and break areas.
6. Encouraging substitution of more energy-efficient technologies in place of requested technologies whenever the substitutions can fulfill clients' performance objectives.
