

SHOULDERPOD LAUNCHES THE S2

The traveller version of our professional smartphone rigs

SMARTPHONES have become the most popular cameras in the world. Travellers and street photographers have widely adopted them because they are easy to use and light to carry around. The drawbacks: mobile devices are difficult to hold in a steady, secure and comfortable way.

The Shoulderpod S2 is a professional handle-grip for holding your smartphone camera comfortably and securely. Fits virtually any mobile device thanks to its adjustable mechanism and wide rubber pads. The longer wooden handle is beautifully crafted in Sapelli wood and its ergonomic design offers a comfortable and natural grip for shooting video and stills. The S2 is part of the Shoulderpod modular system and has been designed and built in Barcelona as the most solid and portable solution for creative travellers and visual storytellers.

3 FUNCTIONS ESPECIALLY DESIGNED FOR CREATIVE TRAVELLERS AND VISUAL STORYTELLERS

UNIVERSAL TRIPOD MOUNT

The S2 includes the most professional, solid and reliable tripod mount in the market. Designed to fit any Smartphone model thanks to its adjustable mechanism.

FILMMAKER HANDLE

Mount the wooden handle plus the wrist strap and hold your Smartphone camera comfortably and securely for taking steady videos and pictures.

TRAVELLER STAND

Our grip stands on its own in landscape or portrait mode so you can use it as a tripod even when you don't have one with you.

RETAIL PRICE \$39,90 | 39,90€

Part of a Modular System

The Shoulderpod platform has been designed as a modular system. Like if it was a LEGO, you can combine its different parts for configuring the solution you need for each project. Modularity is also great for travelling. Select only the parts you need before every trip and avoid carrying that heavy backpack full of unnecessary gear. Currently there are 7 different parts and new accessories will be launched shortly.

The Shoulderpod Series

S2 – The Handle Grip

R2 – The Pocket Rig

X1 – The Pro Rig

About us

At SHOULDERPOD we design and craft high quality tool for using Smartphones as professional cameras. The company was founded in Barcelona in 2014 by a team of engineers, architects and designers with over 20 years experience in product design. Our goal is to make the most advanced equipment for mobile photographers, filmmakers, journalists and travellers. The Shoulderpod products have already become a standard for “mobile journalism” in many broadcasting media like the BBC, France TV or CBS and are widely used by many mobile creatives and visual storytellers all over the world.
