

IT'S THE WICKED BEST TOUR MAP OF BOSTON.

The map you're looking at right now kicks butt for many reasons.

First off, it's made by us pedicabbers, and we always bring tons of coolness to anything we do.

See, we didn't just mark this map with the same old sights and street-names, but with other, far cooler points of interest. We used our intimate knowledge of Boston to tip you off to the spots, sights and scenery that we're sure will surprise and dazzle you as we pedal you around town.

Next, this map describes Boston from a "street traveler's" point of view. We pedicabbers understand how excited and spontaneous people get when they're exploring. So this map was laid out to help give you some sweet ideas on what and where to explore next.

Finally, this map can help you plan out the awesomest darn pedicab tour you could imagine. Because imagination is a Boston pedicab's only limit, you're gonna love what you see!

EXPLORE BOSTON BY NEIGHBORHOOD

Most of the time, an hour-long pedicab tour can explore two or three neighborhoods. A half-hour tour can typically explore one neighborhood and maybe a bit of another. Stuff like traffic patterns, stop lights and other urban pace-setters can vary how much of Boston you can cover on a ride. We suggest you chat with your driver before you set out about how much of the city he or she thinks is possible to fit in to your ride.
