CHEMEX

CHEMEX

You will need:

- Chemex Brewer and filter
- Fresh-roasted, OQ Coffee
- Hot water
- Grinder
- Measuring spoon or scale
- Cups

Grind: Use a paper filter grind (medium-fine), and add the ground coffee to the presoaked filter.

Preheating: Pour hot water through the filter to heat up the chemex and presoak the filter.

Pouring: Start a timer and add enough water to reach the bubble (20oz). The brew should take 4 minutes.

Weighing: Weigh 30g of coffee (roughly 4tbsp) to make two 10oz cups of coffee. If this doesn't suit your taste, adjust!

Wahoo! You're done. Make sure not to burn yourself, but enjoy your coffee before it gets cold!
