## Halo Reach Beta Officially Drops Today, May 3, 2010

May 2nd, 2010 11:12 pm PT

To say Halo Reach is one of the most widely anticipated video games in the history of Interactive Entertainment is perhaps one of the greatest understatements in human history. It will likely be the best selling video game of all time and although the game itself doesn't ship until September 1st, you can still take the multiplayer version of the game out on a test run beginning today. It's the official drop date of the Halo Reach Beta and Halo fans around the world who bought Halo 3: ODST were fortunate enough to also take home with them the key to unlock the beta. All you have to do is put your ODST disk in and select the beta option on the startup menu and you're in. It's just that simple—until the shooting begins. Then you're on your own, Master Chief wannabe.

It's time to bring the pain.
