Rebate Checklist

Get your rebate check faster by checking off these easy steps before mailing your application form. Incomplete applications may be delayed.

- Completely fill out application (mandatory)
- Attach all receipts (original or copies)
- Review Terms and Conditions and sign and date application
- Make and retain copies of all documents and applications
- Dealer portion completely filled out and signed (application Certification)
- Send all documents to correct address listed on application (sending application to billing address will delay your rebate)

Important

A final itemized invoice for all materials, labor and taxes related to the Rebate Application must be attached. For Envelope Measure Retrofit, a pre-qualifying energy evaluation from Black Hills Energy must also be attached. All equipment must be new. No reconditioned or used equipment would qualify for rebates. Proposals are not considered confirmation of purchase and install and are not accepted.

Verification

The sales receipt indicating date of purchase, dealer/contractor name, manufacturer name and model number of equipment must accompany the rebate application. Incomplete applications will be delayed. Black Hills Energy reserves the right to verify sales receipts and installations. After approval, please allow four to six weeks for delivery of the rebate check.

Tax Information

Rebates may be subject to federal and/or state income tax reporting. Applicant is responsible for contacting a qualified tax advisor to determine tax liability. Black Hills Energy is not responsible for any tax consequences of the rebate program.

Disclaimer

Black Hills Energy does not guarantee that installation of equipment qualifying for rebates will result in reduced energy usage or demand, or in cost savings. The Customer will hold harmless Black Hills Energy and its officers, directors, shareholders, agents, employees, and representatives from all claims, liabilities, fines, interest, costs, expenses, and damages incurred by the Customer, for any damage, injury, death, loss or destruction of any kind to persons or property, to the extent the damage, injury, death, loss or destruction arises out of or is related to the conduct, negligence, willful misconduct, misrepresentation, breach of warranty or other breach of this rebate form on the part of Black Hills Energy.

Terms and Conditions
General Eligibility

1. Applicant must be a current Colorado residential natural gas customer of Black Hills Energy.
2. Homes less than 5 years old may participate in the Residential New Construction program or apply for furnace and water heater rebates through the Residential Rebates program.
4. Rebates are available for equipment and insulation installed in heated living spaces only. Equipment or insulation installed in garages or shops are not eligible for rebates.
5. Applications will be processed on a first-come, first-served basis. The program will end when the budget is depleted. Funds are limited.
6. This program is subject to regulatory rules and orders. Black Hills Energy reserves the right to change or to end any portion of this program without notice.
7. To avoid delay, the dealer invoice returned with your rebate application must include manufacturer, model and serial numbers, efficiency rating and date of installation. Equipment cost, labor and tax must be itemized. Labor charges for self-installed jobs are not eligible for rebates.
8. Where applicable, energy efficiency ratings must comply with those listed in the Air-Conditioning, Heating, and Refrigeration Institute (AHRI) directory found at www.ahridirectory.org. All space heating equipment needs to bear the AHRI certified mark. All water heaters must either include AHRI certification or be listed as an ENERGY STAR qualified equipment.
9. Checks will be made payable to customer shown on invoice.
10. To qualify for the rebate, heating equipment must meet minimum efficiency requirements as listed in this application and Black Hills Energy must provide the main heat source fuel. Heat Pumps are considered main heat source regardless of settings, therefore, no heating or envelope measure rebates would be eligible when a Heat Pump is present (with the exception of gas fired absorption Heat Pumps).
