## Helpful Notes!

*Putting some wire in your junimo will give him a little more shape! Put a long piece through his body for the two arms, two little pieces to bend his little feet, and a long piece through his antenna, and he can do wiggly-arms!*

*For his cheeks, you could embroider them, glue felt on, or needle felt them! I prefer needle felting, but the supplies can be hard to find. You can read about the needle felting process here:*

- Stuff, and finish off, leaving a tail.**
- Push the head dimple into shape.**
- Using the tail left at the bottom: sew up through the body, into the dimple, and back down.**
- Keep it loose! This just anchors the shape in place. If done too tightly, it will warp the shape.**

*Dimple out*

*Dimple pushed in*

*Attach eyes between r12 and r13, about 9 stitches apart.)*
