

Scalar Vortex Sound Therapy: An Effective Stress Management & Relaxation Tool for ASD by Dr. Jere Rivera-Dugenio, Ph.D. - 2016 Autism One Conference

Creating scalar energy is very important because there are a lot of devices out there that claim that they create scalar energy but in order to create scalar energy you need to have electricity or something that is an amplifier that actually causes two magnetic waves to come together, electromagnetic - come together and what happens is when electric and magnetic come together is an amazing process an effect. It causes a field or a vacuum if you will and that vacuum or that field is what's known as zero point energy field or scalar field. This space that scalar energy occupies is not empty, it is not a vacuum it is alive with information and energy.

Now let's talk about benefits of scalar energy. First of all when you're exposed to scalar energy it eliminates the effects of man made frequencies such as electrosmog, EMF and Geopathic Stress which is the natural radiation coming from the earth that is caused by underground rock streams, fishers, etc.

Scalar energy increases the energy level of every single cell in the body. It protects your DNA from damage. It increases energy levels in every single hydrogen atom in the body which holds your DNA as verified by a spectrograph. Scalar Energy improves cell wall permeability thus facilitating the intake of nutrients and the detoxifying the elimination of waste in every cell of the body. It cleanses the blood. It improves chylomicron (protein/fat particles floating in the blood) and triglyceride profiles and improves fibrin patterns. It improves the immune system by as much as 149% as proven in laboratory studies in Germany. It improves mental focus and balances the right and left hemispheres of the brain as demonstrated through certain EEG analysis. It also functions as a natural anti depressant since it inhibits uptake of noradrenaline by PC12 nerve cell . So when you're in a scalar field it relaxes you naturally.

In the Max Planck Institute in Germany there is a scientist by the name of Dr. Puharich who conducted a study wherein E. coli microorganisms were exposed to 8.00 Hz of scalar fields that increased the activity of the RAD-6 gene which codes for proteins involved in DNA repair. Lab tests have shown that when red and white blood cells are exposed to scalar fields that scalar energy literally un-glues these cells, while circulation is vastly improving in lymphatic and cardio systems. Every systems starts to flow smoothly.

Think of scalar as a field not a wave. The most important thing is that it is a field in a field that we actually occupy. Some examples of scalar are sound, plasm waves, photons and neutrino radiation are very faster than light particles ejected from black hole or our sun. Examples of electromagnetic that aren't scalar are light, UV radiation. Did you ever come across any device that say they're scalar energy and they're light based, it's impossible because light is electromagnetic. So Tesla/scale waves and electro magnetic/hertzian waves.

So let's bring this back to what we're talking about here. How can we affect the DNA? There are certain Russian scientists by the name of Grazyna Fosar and Franz Bludorf that have proven that the human DNA is like a biological internet and guess what? Can be influenced and reprogrammed by sound frequency and I'm talking about not having to effect the genes in the primitive way where they were cutting and splitting and splicing genes. We're talking about using sound to reprogram the DNA. Russian Biophysicist and molecular biologist Dr.Pjotr Garjajev and Dr. Vladimir Poponin have been carrying out pioneering research into the vibrational state of DNA. They have proven what other scientists are calling junk DNA is not junk DNA. They did not accept that 90% of our DNA is 'junk DNA'.

Nature abhors a vacuum, there's no such thing as empty space. Our DNA, although scientists have said it's a double helix, in actuality there is a third, an invisible helix that occupies space that scientist know is the MAJOR GROOVE. This is located between both strands. Scientists know this as a magnetic field, this major groove exists. Major groove is not empty and it actually contains information for genetic coding. Now Russian scientists have proven that in this major groove things occur that are unexplainable. For example this magnetized area could perhaps cause a white hole black hole effect like what Einstein called the Einstein-Rosen bridge. An actual infinitesimal wormhole or black hole within that major groove of our DNA.

How does that apply to healing? We can actually steer disease and distortions out of the body once we start to effect that major groove. If we give it proper information scalar energy - information and energy to that major groove - certain things start to happen to that DNA. This is how reprogramming the DNA through sound and words, sound frequencies etc is actually doable. Disease can be controlled by sound.

I know it sounds crazy but mathematics reveals that the major groove nestled between the double helix spiral has what we call a mathematical pattern and that mathematical pattern was known by Tesla and he said, "If you only knew the magnificence of the 3,6,9 the you would have the key to the Universe." No one understood what he meant until all this research from Russia was coming out about the junk DNA and the ability to reprogram DNA through sound. This 3,6,9 has everything to do with the morphogenetic field. The 3,6,9 are the magnetic groove within those double helix.

DNA communicates not through electromagnetic waves, it communicates through scalar energy. Cellular communication occurs according to Prof. Konstantin Meyl the preeminent prof and experts on scalar that genetic info travels by scalar energy. He confirms, "The coding regions in the DNA strand, the genes, make up only a fraction of the total amount of DNA> The stretches that flank the coding regions are called introns and consist of non-coding DNA. Introns were looked upon as junk in the early days." In the presence of scalar waves, DNA cells tend to resonate with each other as they attract information and energy from other cells and their environment. If both transmitter and receiver cell are in bio-resonance, then both information and energy are in homeostasis.
