

BULLY TABLE (2013)

The Bully Table is constructed from aluminum plate with a custom patina. Four 1/4 inch thick plates are laser cut, formed and plug welded to create the base with no visible fasteners. The 1/2 inch thick aluminum top registers on the base with 4 hidden pins.

The visually bulky legs with thin profile, coupled with the merging curves of the base plates create a visually dramatic effect as one moves around the table's perimeter. The Bully Table is available with a number of patinas. Color images available upon request.

Type: Dining table

Designer: Steven Haulenbeek

Materials: Aluminum with custom patina.

Dimensions: 96" x 42" x 29.5"
