

### SAND UP LIGHT (2015)

The RBS uplight uses a typically disposable material from the casting industry to create this unique lighting piece. This deceptively simple object is born from the high-tech process of 3D printing. This solid sand light retains the expected natural feel of sand but in a precise and designed form. The RBS uplight can be placed on the floor near a wall or architectural column to visually accentuate the height of a space or it can be used as an accent piece on the table top.

**Type:** Lighting- LED or Incandescent

**Designer:** Steven Haulenbeek

**Materials:** Sand, Resin

**Dimensions:** 8"  $\varnothing$  x 10" H
