CAP WELD BRUSH  
43852B & 44852B

JAZ has introduced to the market a whole family of PREMIUM STRONG PIPELINE BRUSHES for the pipeline oil & gas industry. The PIPELINE 76ER™ lasts 4X longer than any of its competitors and has been called the “BEAST” of the pipeline industry by its end users. Due to the 76ER’s success, JAZ has hit the market with our 6” PIPELINE 56ER™ and 4-1/2” PIPELINE 36ER™, therefore maximizing their performance and being the best in their class!

JAZ has also introduced into the market their new 6” and 7” CAP WELD BRUSHES. These new CAP WELD BRUSHES start at 3/8” knot thickness, and then expand to cover the entire 1/2” cap weld area. Industry standard 1/2” twist knot brushes only do half the job, since half of the brush is outside the 1/2” cap weld area. JAZ’s new 6” and 7” CAP WELD BRUSHES are Pipeliner’s BEST CHOICE when buffing their cap weld area on pipe welds.

Diameter	Wire Size	# of Knots	Face Width	Max RPM	Box Qty.	Part No.	List Price
9”	.020” ST	76	3/16”	6,000	6	44962B	\$46.90
7”	.020” ST	76	3/16”	9,000	10	44762B	\$36.90
7”	.020” ST	50	3/8”	9,000	10	44852B	\$37.78
6”	.020” ST	56	3/16”	12,500	10	43562B	\$34.95
6”	.020” ST	38	3/8”	12,500	10	43852B	\$32.50
4-1/2”	.020” ST	36	3/16”	15,000	6	48362B	\$21.75

See the chart above for available sizes of our PREMIUM STRONG Pipeline Wheels and new Cap Weld Brushes.  
Note: All arbor hole sizes are 5/8”-11.
