

All - I'm embarking on a medical mission to Honduras in September and could really use your prayers and support. We are taking a group of doctors and dentists to a very remote area to help people who are without the comforts that you and I are used to, like clean water and electricity. We'll be there for a week and will have the opportunity to impact hundreds of people who really need it. The link below has videos showing what we'll be doing as well as ways you can help. God bless, and thanks for considering a contribution! <http://staoptw.org/honduras-mission>
