

Lice Inspection Form

Please help us take care of the situation before it becomes a situation!

Our attempt is not to embarrass anyone. The last thing any teenager wants to do is to be found with lice in front of a group of their peers. As a church, help us save them the embarrassment by thoroughly inspecting each camper individually before coming to camp. This will also speed up your church's registration check-in time and be less hassle for your camper delivery driver(s)!

*** Inspector must be a nurse, nurse practitioner, physician assistant, physician, or cosmetologist**

**** Any case where lice are found, the individual will have to leave the campgrounds until lice are fully taken care of (body, bedding, clothes, belongings, etc.). If the individual returns, he/she will be re-inspected and must be cleared before being able to stay**

I, _____, a licensed _____,
Print name of inspector Profession

certify that the following children show no evidence of lice, nits, or eggs:

- | | |
