Fire Chief™ Arborvitae

Thuja occidentalis 'Congabe' PP19,009

Description

There are so many uses for this charming dwarf white cedar that a list would delay our precious gardening time! A soft and lacy fine-textured plant, Fire Chief™ forms a perfect round ball. Sage-green foliage is topped with red tips, offering a distinctive look in foundation plantings, as low hedges, or in borders. And of course, they are splendid elements in containers! Reaching just 3-4' over time, Fire Chief™ requires little to no pruning, making this the perfect, minimal care, landscape plant.
