Little Humans of New York

Brandon Stanton, the photographer and creator of the blog and bestselling book *Humans of New York*, has recently released a companion children's book called *Little Humans of New York*. This new book is full of portraits of young New Yorkers, each accompanied by a fun story about what makes them special. "Over the past four years, there have been hundreds of kids' portraits on HONY, and they've always been one of the most unique and popular parts of the blog," Stanton says. "It was only natural to put them together, especially in a way that makes HONY accessible to a young audience." We couldn't agree more! humansofnewyork.com
