

Trigger Happy Zen Baby - Mchale, Zarick

An undertow is overhead
I know you know or so you said
She shot the moon and soon it bled
the reddest shade of faded dead

An overflow is underway
I know you know or so you say
The blood upon the bed we lay
We say goodbye, we say goodbye

Baby blue, to you, one more goodbye
Maybe you'll be true before you die

It's over now, she understands
I know you know that both her hands
could catch the sky before it lands
But then the angel band disbands

An undertow is overhead
I know you know or so you said
She shot the moon, she shot it dead
We say goodbye, we say goodbye

Baby blue, to you, one more goodbye
Maybe you'll be true before you die
