

Big Wheel - Carter

Make me a wheel, out of anything
Red or white, so fresh and clean
Something new, to ride in the street
Just make it work, and give it a seat

I'll take it everywhere, and show my friends
Save the memory, and shatter the trends
Of knowing forms, all fallen and few
Dirty dreary, so wet and true

Now move along, and try to act fast
Change some settings, and make it last
But in the distance, my wheels undone
Dripping rubber, can I have another one?

Can I have another one?
Don't try to hide
Can I have another one?
I can make it tonight

Can I have another one?
Don't try to hide
Can I have another one?
I can make it tonight

My wheel is broken, can you hear the cries
From rooftops calling, is that thing alive?
I push and pull, but to no avail
Tried my hardest, to ride that rail

Between the lines, you never see
Around the corner, from uncertainty
With my new wheel, all shiny and bright
I can make it anywhere, I can make it tonight

Can I have another one?
Don't try to hide
Can I have another one?
I can make it tonight

Can I have another one?
Don't try to hide
Can I have another one?
I can make it tonight

Palms sweating, muscles tight
I can make it anywhere, I can make it tonight
Truth be told, for just one time
I don't want to fall, if I do I'll hide

Can I have another one?
Don't try to hide
Can I have another one?
I can make it tonight

Can I have another one?
Don't try to hide
Can I have another one?
I can make it tonight
