

AIRBAG RECALL

Teresa Eilers
626-375-1190 -- Teresa.Eilers@slstrategy.com

THE SITUATION

The Takata airbag recall is the largest and most complex safety recall in U.S. history. There are currently 19 affected vehicle manufacturers with an estimated 46 million unrepaired defective airbag inflators under recall in approximately 34 million U.S. vehicles.

The words “grenade” and “ticking time bomb” accurately convey the lethal potential of these defective inflators.

THE SITUATION

The Takata airbags under recall were installed in cars from model years 2000 through 2016. Some of these airbags could deploy explosively injuring or even killing car occupants. Even a minor fender bender can cause these airbag inflators to rupture, spraying metal shrapnel into drivers and passengers.

THE SITUATION

At least 22 people have been killed, including three Californians. Over 200 Americans have suffered serious injuries, including cuts or lacerations to the face or neck, broken or fractured facial bones, loss of eyesight and broken teeth. The most recent death occurred very recently on January 18, 2018 in Holiday, Florida.

THE SITUATION

There are over 500,000 cars affected by the Takata airbag recall in LA County and over 750,000 cars affected by the Takata airbag recall in the LA Metro area.

These airbags will be repaired for free if taken to a dealership.

We need your help to find these vehicles, and get them off the road and repaired immediately.

THE SETTLEMENT

In January 2017, the Japanese air bag manufacturer Takata reached a \$1 billion settlement with the U.S. Justice Department.

As part of the deal, Takata agreed to plead guilty to the felony offense of fraud. Of the \$1 billion, \$25 million will be paid as a fine

to the U.S. government and \$125 million will be used for restitution to people are physically injured by the air bags. The remaining money will go to automakers that were defrauded by

Takata to cover the cost of replacing recalled parts.
