

Markings for On-Street Parking Policy at Single Family Residential Areas

(For Two or Three On-street Parking Spaces)

It is the policy of the City of Hawthorne to consider requests for installing markings for on-street parking spaces (parking "T's") as outlined below.

1. Markings for on-street parking shall be in residential area

Residents may request the City to investigate specific street location for painting the markings for on-street parking. When such a request is made the following procedure will be followed.

a) An application is REQUIRED.

Before the City will consider such requests, the residents must submit an application to the Public Works Engineering Division.

b) If Standard City Criteria for installing marked on-street parking spaces are met;

The Engineering Division will determine whether the subject location meets the City's standard criteria for installing marked parking spaces. These standard criteria are as follows:

- I) On-street parking is currently allowed at the subject location.
- II) The area for two on-street parking spaces, it shall be a minimum of 36' in length. Each of the end parking spaces shall have a distance of 18' long.
- III) The area for three on-street parking spaces, it shall be a minimum of 58' in length. Each of the end parking spaces shall have a distance of 18' long. The parking space in the center shall have a length of 22'.

c) In the event that the criteria outlined in paragraph 1 b) are not met, the Engineering Division will require adjacent property owners' consents and signatures on the application. The Engineering Division will review the feasibility of marked parking spaces based on a case-by-case basis. However, in no case shall two on-street parking spaces be less than 30' long and three on-street parking spaces be less than 52' long.
