

I know tradition is the BK crown. Some may like this too.

Print, Laminate, Trim white parts away. Cut on white lines in gold area for extra side straps. Overlap these with front crown section and affix with clear packaging tape on both front and back.

Tabs and slits in the side straps could be used to hitch behind the head or tape them together to fit. Or, print, assemble, and laminate using just clear packaging tape.

The 1st of these went to San Gabriel on Katahdin 2010
