

## **Scott O'Day and Charles Gorczynski Tango Duo**

**Charles Gorczynski** Bandoneón  
**Scott O'Day** Guitar

Traditional tango duets for concerts and milongas.

**Scott O'Day** is a guitarist and violinist dedicated to the music of tango. He has performed in the café-bars of Buenos Aires with members of 34 Puñaladas and Palermo Trio. Scott is in demand as a prominent tango guitarist in the San Francisco Bay Area, and can be heard weekly with his own musical projects. He also regularly performs original guitar arrangements of classic tangos and South American songs as a soloist, and has appeared in art galleries, festivals, restaurants, and other venues. A world traveller and scholar, Scott has extensively researched music in Argentina, Spain, and Nepal. Scott is also a music teacher in Bay Area middle and high schools, as well as his own studio of guitar and violin students.

**Charles Gorczynski** is a bandoneonist / composer and leads the Redwood Tango Ensemble, a tango quintet in San Francisco. From an early background in improvisation and jazz harmony he gradually found his way towards tango music and became increasingly obsessed with both the bandoneón and transcribing the early orchestras. After subsequent years of study and a move to the Bay Area he became a dedicated student of the music and style. Charles has led Redwood Tango and his instrumental group Colorlist through several tours in the US, Canada, and Italy. As a composer his original work has been released with Ropeadope Records, 482 Music, Serein Records, and a host of local labels and film houses. Charles is also a dedicated teacher and maintains a studio of music students in the Bay Area.

# Quick Facts

- Performer:** Charles Gorczynski and Scott O'Day - Argentine Tango Duets.  
Bandoneón and Guitar.

## Technical Requirements

Scott and Charles play in a variety of spaces, and comfortably adapt to the available options in each.

**Audio: For Concerts:** Charles uses his own microphones (2) which will require two lines in to the house system. Scott requires a line in for the pickup or a mic for the amp, and we need one talkback mic. We are the world's easiest set-up. **For Milongas:** We travel with all required sound equipment (microphones, mixer, PA etc) and nothing is required.

We do appreciate a 30 minute soundcheck to settle any monitoring issues.

Thank you!
