

## PLANT AVAILABILITY & PRICE LIST

---

This list is updated regularly with our current selection of fruiting trees, edible plants & vegetables. We do our best to ensure all information is accurate at any given time but please understand prices & sizes available are subject to change without notice.

Notes regarding our plants and growing practices:  
All the plants we sell are GMO-free

We propagate from seed, cutting or liner stage organically without any pesticides or chemical fertilizer. Our nursery is also a sanctuary for plants. Some of our selection is brought in from other nurseries and have not necessarily been grown organically before coming to us. Once arriving at our nursery, we care for all plants naturally.

**This list provides plants we typically carry, but does not indicate that it is in stock. Please call if you are looking for a particular cultivar or species.**

**Please visit our website for more information on each plant as well as our blog, news, workshop information & discounts that may be available!**
