

The widest combination locks range currently on the market!

Serrature Meroni presents the new 10 Series: a complete range of combination locks for any type of furniture.

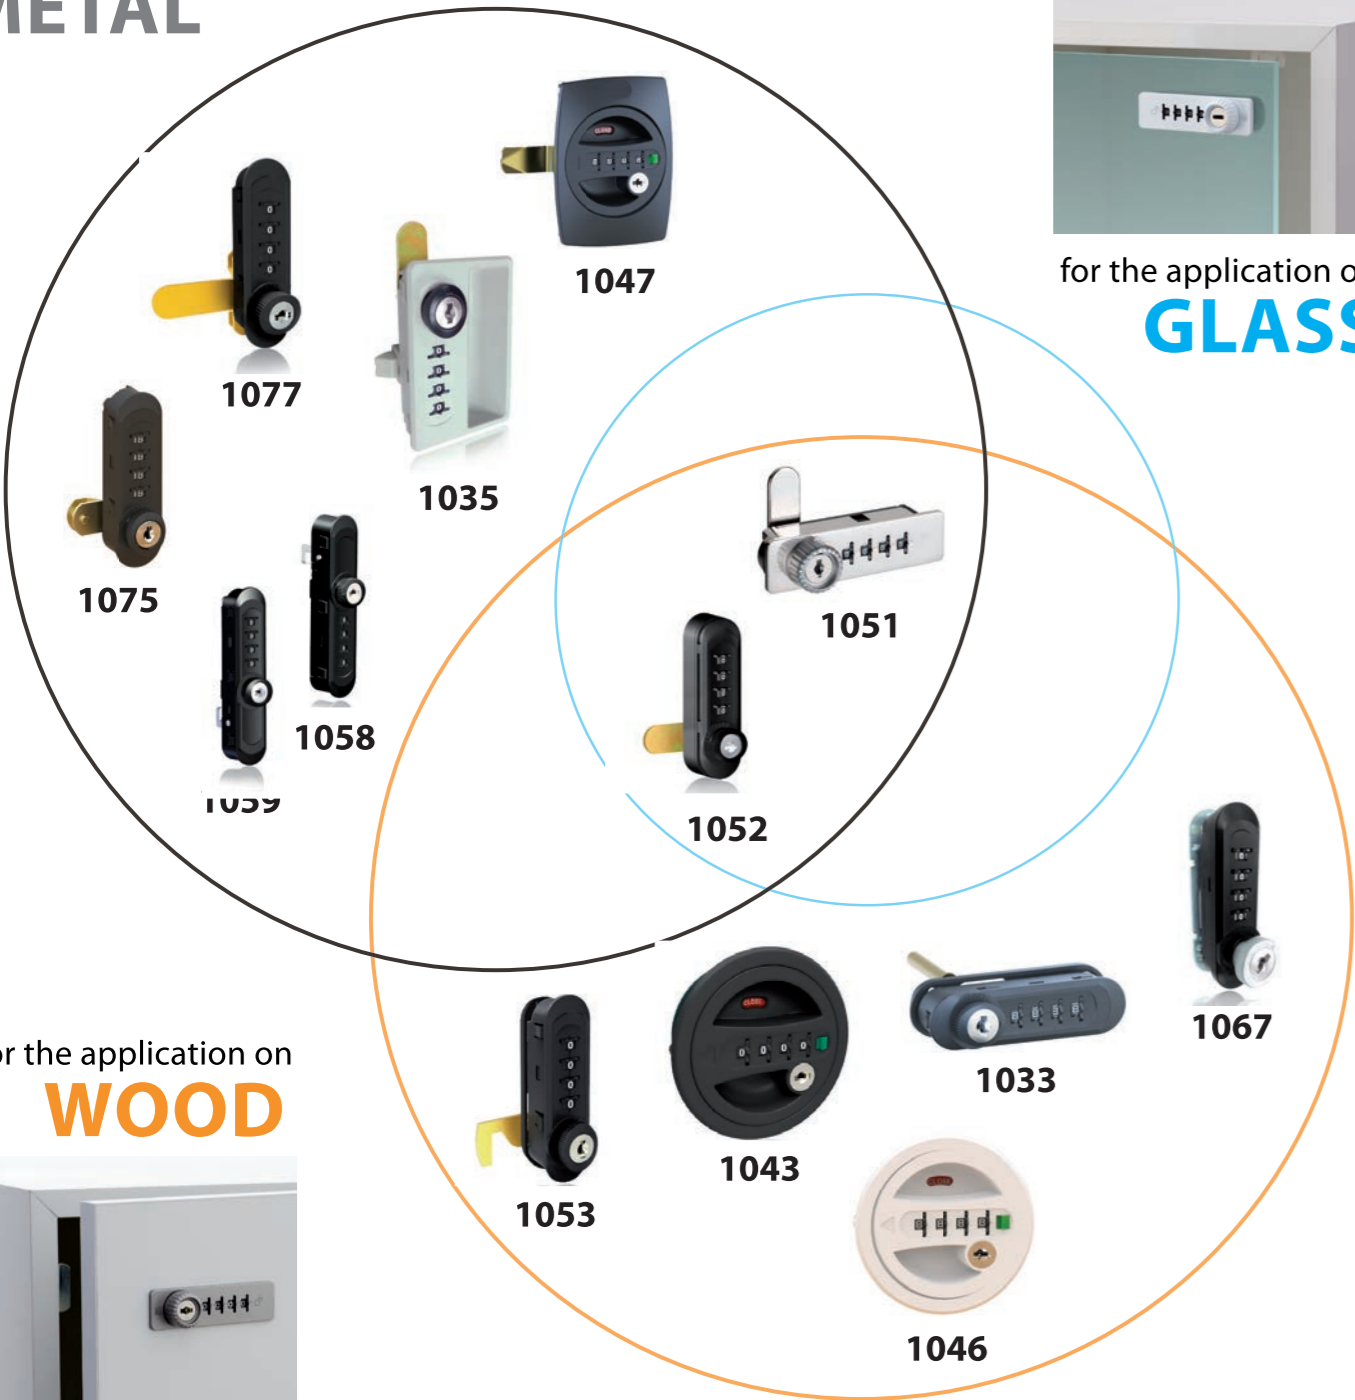

for the application on
METAL

The wide range of combination locks (10 Series) by Serrature Meroni is the solution to securely and easily close cabinets and lockers in gym changing rooms and in SPAs, in public buildings, in schools and hospitals: for any structure where a combination lock is an added value in terms of service and in terms of convenience, since keys or padlocks are not necessary. Moreover, the 10 Series combination locks are suitable for any need and are the solution for any piece of furniture of any material.

The solution for any furniture
The combination locks show the same functional features in a variety of shapes, materials and applications.
The 4 digits combination locks are a smart closing solution for lockers, drawers, filing cabinets: any type of furniture in public or private spaces such as offices, gyms, dressing rooms and schools.

VISIT THE WEBSITE TO FIND OUT THE RIGHT SOLUTION FOR YOUR NEEDS AND TO DOWNLOAD THE DATASHEETS.

STANDARD LINE

The Standard Line of 10 Series features a wide and complete range of functions and offers the highest level of comfort and efficiency in a cost-effective solution. These combination locks have a plastic cover; a knob with its cylinder for a simple code recovery. The Standard Line locks are available in two finishes: matt white and black. The knob, ergonomic and grooved for a perfect grip, is integrated in most of the locks.

Simple to use, ready to fix, cost-effective and efficient, the 10 Series combination locks are keyless closure systems: select a 4 digits code and assign it to the lock, rotate the knob until closure and spin the digits at random.
Every lock is equipped with a cylinder and an emergency key, for the exclusive use of the maintenance service, to recover the secret code.

mode
PUBLIC

mode
PERSONAL

Meroni's combination locks are flexible closing systems: the same lock can be set to work in the **public mode** (default setting) or in the **personal mode**, according to the requirements of the specific application. The public version is the solution for multi-users furniture (i.e. lockers in gyms or in public buildings) while the personal version is suitable for limited access furniture and it has been specifically studied for single-user applications (as school lockers, office drawers, jewelries or electronics shop exhibitors).
