

THE TALON TIMES

VOLUME 10, ISSUE 9

Build Season Week 4

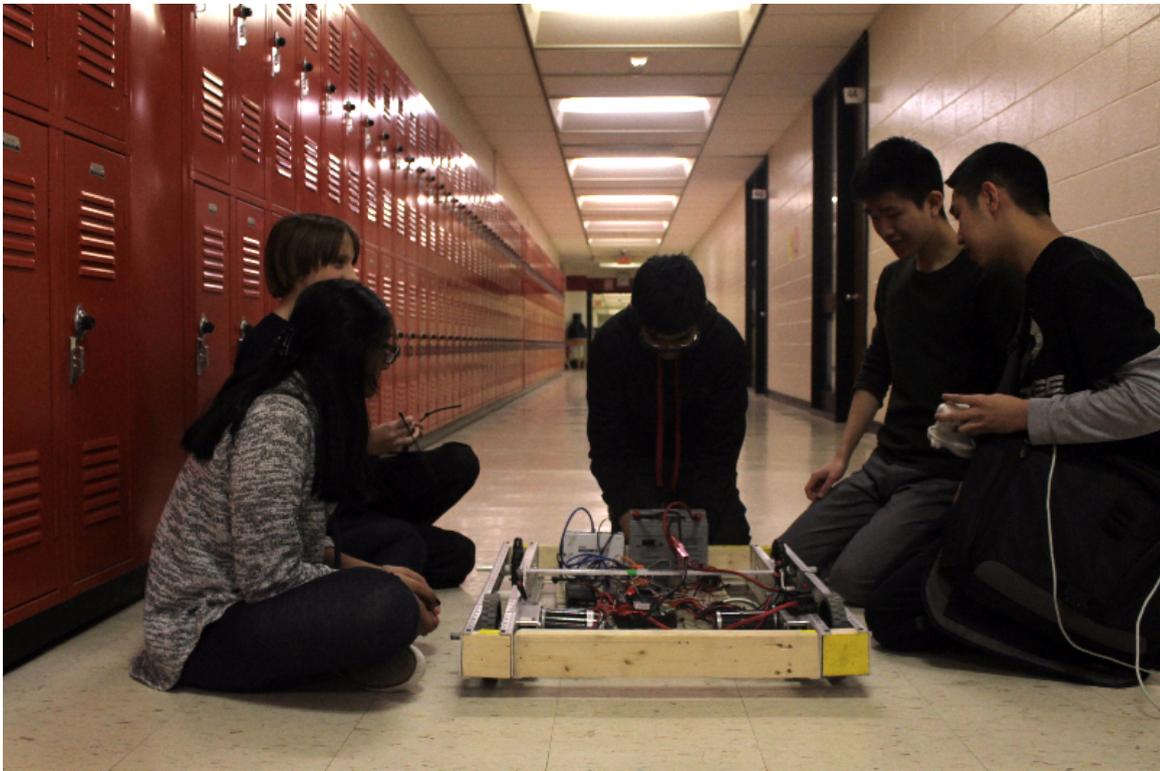

Dean's List

Every year, our team selects two members who best represent FIRST traits to be in Dean's list. This special position requires a sophomore or junior who demonstrates leadership and follows the ideas of FIRST. These students must be passionate in committing to FIRST. The selected participants must portray an interest in FIRST and spread that passion to others in the community. Our team went through two selection processes to find two perfect members to represent this place. Finally, we selected Ojas Amberkar and Bryant Schultz to represent our team and appertain in Dean's list.

Finalization

In the past week, the TALON 540 team retrieves their two frames for the drivetrains. With these two frames, the technical team will finally be able to construct the robot and add the necessary parts in order to complete the tasks. So far, we are finalizing the robot parts and the CAD designs to support these ideas. By Saturday, our plan is to complete both the prototype and the final robot and start prep driving for competitions. In order to drive the robot, the drive team must practice and fully comprehend the various techniques in moving the robot. By February 4, the drive team of TALON 540 will be finalized and we will be able to start practicing.

Summary

This week was moderately calm as we did not have activities outside of school. Overall, this week we were fully engrossed in the attempting to finish the robot. Now that the drive team is close to being finalized, we plan on practicing so that we are efficient during the competitions. Furthermore, we hope to continue in the building process and have a working robot by the coming Saturday.
