Your patients want and need help managing their chronic conditions. In addition to clinical risk factors, socio-economic risk factors such as job loss and housing instability have increased due to the pandemic.

Our turn-key approach eliminates the need to spend time and money hiring additional staff and requires no upfront capital investment. Patients who have chronic illnesses are more susceptible to the clinical, socio-economic, and psychological effects of COVID-19.

Providing built-in documentation of patient outcomes.

Value-Based Payment and Chronic Care Management go hand-in-hand. Establishing a Chronic Care Management program now will keep you ahead of the curve by:

- CRM will nearly triple to 100%.
- 3 in 4 patients with chronic conditions want their provider to touch base regularly.
- 88% of patients who used telehealth services for the first time during the pandemic would use it again.
- Patients are rapidly becoming more comfortable and accepting of telehealth visits as a part of their care.
- 83.4% of patients with chronic conditions want their provider to touch base regularly.
- Early findings indicate that the COVID-19 crisis can exacerbate mental health symptoms.

Our technology-enabled services capture and store all relevant data for patient and provider communication, including presentation of auditable and billable records.
