Investment Options

Do you want to allow your employees to open a self-directed "Brokerage-Window" account?

Yes No While there is no additional charge for this service, Wellington typically recommends selecting "No" to prohibit access to "Brokerage-Window" accounts. (See below for a detailed comparison of Pros and Cons).

Pros of "Brokerage-Window" Account:

- A more sophisticated workforce may be interested in having complete control of their investments, including all asset allocation and trade order execution, which may improve plan participation.
- Employees will be able to choose from over 6,000 mutual funds, plus all listed stocks, bonds & ETF's on the NYSE & NASDAQ.

Cons of "Brokerage-Window" Account:

- Allowing employees full control of their accounts can often times lead some to over trade their accounts, resulting in significant losses from poor market timing, excessive trading, and/or investing in speculative stocks.
- These accounts can make employees feel overwhelmed by the extensive list of options and consequently, some may never finish enrolling in the plan.

If yes, would you like to place any restrictions on the Trading Menu?

- | | | | | | |
