

TYCUDA GROUP

MacDougall Investment
Counsel Inc.

AT THE TYCUDA GROUP WE ARE ALSO INVESTORS. WE TAKE OWNERSHIP IN THE SAME STRATEGIES AS OUR CLIENTS.

THE TYCUDA GROUP are less about walking on a beach and more about the grit and resolve that it takes to manage money well. We stand steadfast in the face of uncertainty, and help you maintain the discipline necessary to achieve your financial goals, whatever those may be.

We specialize in wealth management and defined contribution plans for private clients and institutions. Find out more at tycuda.com

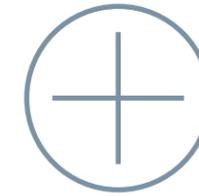

OUR STORY

THE TYCUDA GROUP WAS FOUNDED BY MILES CLYNE.

Miles has managed money for over 18 years and has developed a proprietary investment process designed to balance risk, return, and recovery, the latter being the true differentiator of the Tycuda Group.

Investment vehicles that are fast and sleek can be fraught with risk. They may eventually break down, or blow up. At the Tycuda Group our portfolios are designed to account for market anomalies, systematically capturing investment opportunities that are often missed due to subjective reasons.

Managing money is about endurance. Your money needs to go the distance. Investment advisors don't often use words like torque. Our portfolios are designed to power through risk, slowly and methodically building value over time.

SERVICES

WEALTH MANAGEMENT: tax strategies, retirement planning and inter-generational wealth transfer, discretionary portfolio management, and strategic planning.

At Tycuda Group we customize our strategies into sub-models that are uniquely tailored to the individual investment objectives of our private clients. This allows us the ability to personalize the risk profile of each account that we manage. We also employ a reserve tactic where we set aside capital if we believe we are entering a volatile market environment, putting the money back to work when the absolute risks are better understood.

INSTITUTIONAL AND ENDOWMENT FUND MANAGEMENT: budgeting, investment advice, and strategic long term planning.

DEFINED CONTRIBUTION MANAGEMENT: help retain employees, assist in providing a cost-effective retirement income benefit, navigate plan choices and fiduciary duties, assist in presenting options, and assume day-to-day management.

At Tycuda Group, we work with employers to ensure that their employees are getting the most out of their pension plan. This has a direct impact on their ability to retain employees. People want to align with employers that offer a successful and effective retirement plan.

PRIVATE HEALTH SERVICES PLANNING FOR SMALL BUSINESSES AND ENTREPRENEURS: maximize benefits for business owners.

INVESTMENT PROCESS

EVERYONE TALKS ABOUT RISK AND RETURN, BUT VERY FEW PEOPLE TALK ABOUT RECOVERY.

The Tycuda Group works to create tangible value for its clients through the use of a proprietary portfolio management system that balances return against risk and recovery.

Our software is overturning some concepts that have been long standing in the market place. We are challenging the status quo and coming up with new thinking and new processes.

Very few investment advisors account for the speed in which securities recover. We do. This is a core differentiator of our group. How and why we do this really is worth looking into.

We also rely on separately managed accounts (SMA). Our clients benefit from our sophisticated processes within the confines of their own account. It is designed to be the perfect balance between transparency and security.
