Artist Talks / Multi-Media Readings

For artist talks and multi-media poetry readings, the artwork reproduces best on an HD screen. The artist presents on an iPad mini and can connect via HDMI to a monitor or via VGA to standard projectors. While the artist will provide her own dongle, it's always a good idea to have some on hand for any unique equipment. The artist also requires a podium to set the iPad and book on while reading.

- HD Monitor (preferred) or projector
- HDMI cable or VGA cable
- Podium or music stand
- iPad compatible Dongles (optional)

Simple Poetry Readings

If digital equipment is not available, the artist can adjust selections for an informal straight reading from her book. Please provide a podium or music stand.

These readings can be stand alone or can take place in the art gallery where the same artworks are being presented.
