Tour #2
Tour of the NC State University Newly Renovated Talley Center and Reynolds Coliseum Currently Under Construction
September 24, 2015 - Bus leaves promptly at 8:30

Talley Center
The tour will include a brief history of the building and discussion of the role of the Union at NC State. The visit will include all of the public areas including student affairs offices, event spaces, dining venues, and outside spaces, including some 'behind the scenes' areas. Here are a few facts about the recent renovation.

- Highlights include a new State Ballroom with a 1,200 person seating capacity, six new dining venues, a brand new 40,000 SF flagship bookstore (Wolfpack Outfitters), and a renovated Stewart Theater (seats 750).
- Rodgers Russel Dayeco, Cooper Carry (interior), and Duda|Paine were the main project partners.
- The renovation and addition project increased the square footage from 169,000 to 283,000
- Budget of $120 million
- The project is anticipating LEED Silver Certification
- 50,000 gallon cistern collects rainwater from the roof and the project includes an extensive recycling and a new composting program

Reynolds Coliseum
The main objective of the current renovation is to remove approximately 1/3 of the interior seating structure and construct a two story structural steel infill in its place that will create spaces for athletic offices, Walk of Fame exhibits, mechanical equipment, etc. In addition to the infill portion of the project, the arena is being upgraded with new hardwood flooring, telescoping bleachers, restrooms, finishes, and ADA seating for use by the various sports including Women’s Basketball. The tour will include:

- Discussion of construction logistical challenges including demolishing a building from the inside, hazardous materials abatement, getting equipment into the building etc.
- Tour of the arena level steel erection, mezzanine level and Walk of Fame
- Arena upgrades including ADA access, elevator access, new hardwood court, seating upgrades
- Mechanical upgrades including chilled water lines and air handlers to provide A/C in Reynolds for the first time.

THIS IS AN ACTIVE CONSTRUCTION SITE. HARDHATS, BOOTS AND SAFETY GLASSES WILL BE REQUIRED. PLEASE BRING THESE ITEMS WITH YOU. A SIGNED FORM WILL ALSO BE REQUIRED.
