PROCESS

Our process is a simple one: make heirloom quality furniture that is unique, warm, and inviting to the touch. We believe that furniture should be functional pieces of art, so we create pieces that are intended to be used and loved, that tell your family's story. We hand select the finest, most interesting wood to ensure that each piece we build is different from the last. We use traditional woodworking joints like mortise and tenon, and dovetails to ensure each piece will outlast the maker. We also mix mediums with wood and steel for a modern take on traditional furniture. All of the steel is carefully welded by us, in-house, to ensure the highest level of quality and strength. At Gudde Co, our goal is to make the highest quality of furniture possible. Gudde Co. creates furniture with your future generations in mind.
