Ergonomic intraocular lens (IOL) injectors with innovative LubriMATRIX™ treatment technology
Smooth Navigation
for single-piece hydrophilic and hydrophobic IOLs

lioli™ is a truly unique IOL delivery system that utilizes the innovative LubriMATRIX™ treatment technology specifically designed and developed to enable a safer, simpler and more effective intraocular lens (IOL) delivery. LubriMATRIX™ protects the IOL from damage during cataract surgery.

The lioli™ IOL Delivery System

The lioli™ IOL Delivery System, packaged in sets of 10, is available in a range of incision sizes. Each set contains a sterile single-use injector and a LubriMATRIX™-treated cartridge.

- LIOLI-24 lioli™ Injector set for 2.4mm incision size
- LIOLI-22 lioli™ Injector set for 2.2mm incision size
- LIOLI-18 lioli™ Injector set for 1.8mm incision size

AST Products, Inc.

AST Products, Inc. was founded in 1989 to develop novel surface technologies and coatings. Initially a research-based organization, AST now offers medical device products and a line of patented and proprietary coatings for the medical device and specialty materials industries. AST also provides specially engineered plasma reactors and analysis equipment that facilitate the application of its advanced surface treatment technologies.

Headquartered in Billerica, MA, AST operates a 23,000 square-foot facility fully equipped with Class 10,000 and Class 100,000 cleanrooms, and advanced analytical and research labs. As an ISO registered (ISO 9001:2008, ISO 13485:2003), Good Manufacturing Practice (GMP) compliant business, AST can offer contract coating services to companies that require the highest degree of quality from their suppliers.
