The Vanishing Treasures Program is partnering with Glacier National Park, Glacier National Park Conservancy, The Montana Preservation Alliance, and A&E Architects to offer a hands-on preservation workshop at Glacier National Park’s Wheeler Camp on Lake McDonald. The workshop will include presentations on historic preservation principles, appropriate treatments for historic glass and wood windows, and the history of the Wheeler Camp. The majority of the workshop will be conducted in the field and dedicated to hands-on preservation of historic elements, led by Historic Preservation Specialist Al Williams of Historic Preservation Services LLC, the Montana Preservation Alliance, and A&E architects.
