

Detailed Report – Total Cost: Pediatrics

The overall cost of care for children is a measure of all pediatric costs paid to medical groups by patients and their health insurance plans. Information about the cost of care helps you compare and choose health care based on value – balancing quality and outcomes with the overall cost. [Learn more](#)

The overall average cost of care for children by all reporting medical groups is \$238 per patient per month. The information is based on 2015 claims data. It does not include data from government programs such as Medicare or MinnesotaCare.

To search by medical group name or location, go to the Cost of Services & Procedures Ratings.
