

OANDO ENERGY RESOURCES ANNOUNCES CONTINUANCE TO BRITISH COLUMBIA

CALGARY, ALBERTA, September 2, 2015 – Oando Energy Resources Inc. (“OER” or the “Company”) (TSX: OER), a company focused on oil and gas exploration and production in Nigeria, today announced that, effective August 31, 2015, it has continued (the “Continuance”) from the federal jurisdiction of Canada into the Province of British Columbia under the Business Corporations Act (British Columbia). The shareholders of the Company approved the Continuance by special resolution at the annual and special meeting of shareholders held on June 11, 2015.

About Oando Energy Resources Inc. (OER)

OER currently has a broad suite of producing, development and exploration assets in the Gulf of Guinea (predominantly in Nigeria). Average production for OER in the second quarter of 2015 was 56,163 boe/d.

Cautionary Statements

More information about the Company’s oil and gas assets, including cautionary language regarding the estimation of reserves and resources, can be found in the most recent Form 51-101F1 filed under the Company’s profile on SEDAR at www.sedar.com. “Gross” or “gross” means, when used in relation to production, reserves and resources, OER’s working interest share of production, reserves and resources before deduction of royalties. “Net” or “net” means, when used in relation to production, reserves and resources, either OER’s working interest share of production, reserves and resources after deduction of royalties or OER’s entitlement to production reserves and resources after deduction of royalties and PPT for production sharing contracts. In relation to OER’s interest in wells, “Net” or “net” means the number of wells obtained by aggregating OER’s working interest in each of its gross wells. In relation to OER’s interest in property, “Net” or “net” means the total area in which OER has an interest multiplied by the working interest owned by OER. “WI” means with respect to interests governed by a JOA, PSC, farm-in agreement or farm-out agreement, the undivided interest of such party (expressed as a percentage of the total interests of all parties in the contract) in the rights and obligations derived from such contract, which may be an operating or non-operating interest.

Oil and Gas Equivalents

Production information is commonly reported in units of barrel of oil equivalent (“boe” or “Mboe” or “MMboe”) or in units of natural gas equivalent (“Mcf” or “MMcf” or “Bcfe”). However, boe’s or Mcf’s may be misleading, particularly if used in isolation. A boe conversion ratio of 6 Mcf = 1 barrel, or a Mcf conversion ratio of 1 barrel = 6 Mcf, is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. Readers are cautioned that boe may be misleading, particularly if used in isolation.

Forward Looking Statements:

This news release contains forward-looking statements and forward-looking information within the meaning of applicable securities laws. The use of any of the words “expect”, “anticipate”, “continue”, “estimate”, “objective”, “ongoing”, “may”, “will”, “project”, “should”, “believe”, “plans”, “intends” and similar expressions are intended to identify forward-looking information or statements. In particular, this news release contains forward-looking statements relating to intended acquisitions.

Although the Company believes that the expectations and assumptions on which such forward-looking statements and information are reasonable, undue reliance should not be placed on the forward-looking statements and information because the Company can give no assurance that such statements and information will prove to be correct. Since forward-looking statements and information address future events and conditions, by their very nature they involve inherent risks and uncertainties.

Actual results could differ materially from those currently anticipated due to a number of factors and risks. These include, but are not limited to: risks related to international operations, the integration of assets acquired under the COP acquisition, the actual results of current exploration and drilling activities, changes in project parameters as plans continue to be refined and the future price of crude oil. Accordingly, readers should not place undue reliance on the forward-looking statements. Readers are cautioned that the foregoing list of factors is not exhaustive.

Additional information on these and other factors that could affect the Company’s financial results are included in reports on file with applicable securities regulatory authorities and may be accessed through the SEDAR website (www.sedar.com) under the Company. The forward-looking statements and information contained in this news release are made as of the date hereof and the Company undertakes no obligation to update publicly or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise, unless so required by applicable securities laws.
