

IWCF Drilling Well Control Level 2 (Introductory)

Scope (Target audience)

The Level 2 (Introductory) course is designed for delegates "working in roles which may directly contribute to the creation, detection or control of a well influx" (p.9, OGP Report 476).

Level 2 Well Control is a mandatory prerequisite for anyone who requires a Level 3 (Driller) or Level 4 (Supervisor) Well Control Certificate.

Duration:

3 days + IWCF examination on 4th day

Course Content:

- Barrier management
- Risk management
- Fundamentals of formation pressure
- How well control events occur
- Consequences of a well control event
- How well control events are detected/avoided
- Basic risk calculations
- Roles and Responsibilities
- Overview of the key equipment
- Kill procedures
- Scenario based incidents

Prerequisite:

Identification card or passport

Prior to attending, delegates shall indicate which type of BOP certificate course is required:

- Surface BOP certificate course or,
- Combined (Surface and Subsea) BOP certificate course

Additional Information:

Minimum number of Candidates: 2

Maximum number of Candidates: 10

Validation: 5 years

Note: Registration must be done a minimum 10 days before the course commencement date.

To obtain a certificate, the candidate must achieve a minimum grade of 70% in each of the two sections of the programme (Written test on equipment knowledge and on principles and procedures).
