

## IWCF Drilling Well Control Level 3 (Driller)

### Scope (Target audience):

This course has been designed for drilling crew (drillers and assistant drillers) and others with a requirement to hold an IWCF Well Control certificate.

Delegates must hold a valid Drilling Level 2 or Level 3 certificate to be eligible for this course. If the delegate is new to IWCF training or if the delegate's previous certificate has lapsed 24 months beyond the expiry date, he/she will be required to achieve a Level 2 certificate first.

### Duration:

4 days + IWCF examination on 5th day

### Course Content

- Barrier management
- Risk management
- Formation and fracture pressure
- How well control events occur
- Consequences of a well control event
- How well control events are detected/avoided
- Basic risk calculations
- Roles and Responsibilities
- Comprehensive knowledge of Well Control equipment
- Kill procedures
- Practical exercises on simulator
- Scenario based incidents

### Prerequisite:

Identification card or passport

Prior to attending, delegates shall indicate which type of BOP certificate course is required:

- Surface BOP certificate course or,
- Combined (Surface and Subsea) BOP certificate course

### Additional Information

Minimum number of Candidates: 4

Maximum number of Candidates: 10

Validation: 2 years

**Note:** Registration must be done a minimum 10 days before the course commencement date.

To obtain a certificate, the candidate must achieve a minimum grade of 70% in each of the three sections of the programme (Practical assessment using simulator equipment, and written test on equipment knowledge and on principles and procedures).
