### Personal Names A-Z

#### Notes on Personal Names:

When birth and/or death years can be verified in genealogical resources, they are included after an individual's name. In cases where this cannot be determined, or when there was more than one individual with a particular name active at the same time, birth and/or death years are excluded.

There are many variant spellings of names, primarily surnames (i.e., Deyo, Doiau, De You). Surnames are transcribed in the Title, Description, and Notes fields as they appear in the original document; standard accepted spellings are used in the Personal Names field.

HHS is grateful for the contributions of J. Michael Smith in the transcription of some Indigenous names in NPHD.
