Elizabeth,

I just wanted to drop you a note to thank yourself and the GFWC-WI for your generous donation of a pediatric jump bag.

In the past, the equipment that is contained in this one multi-purpose bag would have been kept in a number of different equipment bags. This makes our job a lot easier knowing that everything we need is in one location.

The equipment was already used this past fall when we got a call that no one wants to hear - a child in respiratory distress. Whether your members know this or not, they were with us that night. Maybe not in person but by using the equipment you gave us. The outcome from that call was positive and the child is doing great.

Thanks again to the GFWC-WI members and all who made this possible.
