Adding Charm

Design by Milk & Honey Home, LLC, www.milkandhoneyhome.com

Designers Julie Holloway and Ansha Duvell of Milk & Honey Home, LLC, created a Warm and Welcoming master suite defined by rich colors, layers of texture and ample seating. One of the luxuries of a master suite is having a space away from the bed for watching TV, reading, playing bills and other tasks. Milk & Honey Home defined this separate space with an armchair, sofa and lounge chair as well as accent furniture—coffee tables, end tables and a TV console—that provide added functionality. Conventional artwork and low-hanging light fixtures form an inviting vignette, while a similar color scheme ties the space together. On the other side of the room, a tall mirror increases the open feel, and another casually-placed chair and stool create the perfect spot to sit and gaze for a moment. Additional storage across from the bed is framed by eye-catching art and accessories.
