## LADDERS

The classic sliding ladders have a roller carriage at the top of the ladder that slides along a rail attached to the shelf unit. This allows the ladder to easily be lifted outward slightly and elegantly glided to the desired spot with minimum effort. Swivel feet deftly compensate for any uneven

areas of the floor and have a non-slip base for very stable footing. All ladders can be further personalized by varying the steps or railings, or by giving the steel a partial or complete mirror finish. Whether as a library ladder, in showrooms, kitchens or even as steps leading up to a gallery – ladders from MWE offer the perfect solution to a wide range of needs.
